The Portuguese flight school "Pull Up Academy" has chosen the Sonaca 200

For the 5th edition of the Portugal Air Summit, which takes place from October 13 to 17, 2021, the Pull Up Academy flight school announced that it has selected the Sonaca 200 to reinforce its fleet of training aircraft.

"Pull Up Academy aims to provide the most professional training to student pilots by preparing them for the complex environment that the air transport industry has become. The Sonaca 200 Trainer Pro¹, equipped with proven technologies and certified instruments, will allow our students to become familiar with the work of an airline pilot thanks to the use of avionics, the accuracy of the data and also by training on a powerful, reliable and "trustworthy" aircraft which has proven its efficiency in its training mission. » João Roque, Co-Founder & Manager at Pull Up Academy.

"We are honored that Pull Up Academy has chosen to use the Sonaca 200. This new sale reinforces Sonaca Aircraft's international expansion and its positioning with pilot training schools." said Pierre Van Wetter, Chief Commercial Officer of Sonaca Aircraft.

About Pull Up Academy

Pull Up Academy is a new International Flight School with the aim to provide an integrated Airline Transport Pilot License ATPL(A) course with the necessary level of proficiency to enable them to work as airplane pilots in commercial air transport operations. Located in Bragança, Portugal, the conditions offered to the students are the best both in theoretical and practical terms. Theory will be taught in the state-of-the-art building Brigantia EcoPark, and from the Bragança aerodrome. Flight students will then take their first flight lessons in a modern and advanced aircraft, the Sonaca 200 Trainer Pro.

About Sonaca Aircraft

Sonaca Aircraft is a subsidiary of the Sonaca group, a major stakeholder for over 80 years in the development, manufacture and assembly of advanced aeronautical structures for the civil, military and space markets. Sonaca Aircraft is 90% owned by the Sonaca aeronautics original equipment manufacturer. The two-seater aircraft "Sonaca 200" has been specially designed and adapted for pilot training and leisure flights. The Sonaca 200 stands out due to its robust structure, which is entirely made of metal, its extremely safe piloting behavior, its high payload mass and its very low operating cost thanks to the expertise of a worldwide aeronautics group.
